THE 10 ORBS — SHORT TERM GOALS AND INTERVENTIONS

Orb 1: Blood Work — Baseline Labs

CPT: 83036, 80053

Short Term Goal / Objective:

Patient will complete baseline HbA1c and Comprehensive Metabolic Panel within 48 hours of plan start.

Target Date: June 13–14, 2025

Completion Date: _____

Status: _____

Intervention:

- Location: Quest Diagnostics, 1200 S Lamar Blvd, Austin TX 78405.
- HbA1c (83036): establishes diabetes baseline for 3-month tracking.
- CMP (80053): assesses kidney function, electrolytes, liver panel.
- Hard stop: must be completed by June 14. Results reviewed by Dr. Nair before next orb group.

Frequency: One-time

Duration: Same-day lab visit

Progress: Plans to start

Orb 2: Begin Metformin 500mg

Rx: Metformin HCl 500mg

Short Term Goal / Objective:

Patient will begin Metformin HCl 500mg twice daily with meals and maintain adherence throughout plan.

Target Date: June 13, 2025 (Day One)

Completion Date: _____

Status: _____

Intervention:

- Schedule: 8:00 AM with breakfast and 7:00 PM with dinner.
- Always take with food to reduce gastrointestinal side effects.
- Patient to set phone reminders for both doses.
- Report any persistent nausea, vomiting, or stomach pain to Dr. Nair.

Frequency: Twice daily

Duration: Ongoing

Progress: Plans to start

Orb 3: Begin Lisinopril 10mg

Rx: Lisinopril 10mg

Short Term Goal / Objective:

Patient will begin Lisinopril 10mg once daily and monitor for side effects.

Target Date: June 13, 2025 (Day One)

Completion Date: _____

Status: _____

Intervention:

- Schedule: once every morning at the same time, with water.
- Monitor for dry persistent cough — report to Dr. Nair immediately if it occurs.
- Do NOT take with potassium supplements or potassium-rich salt substitutes.
- Do not stop medication without consulting Dr. Nair.

Frequency: Once daily

Duration: Ongoing

Progress: Plans to start

Orb 4: Begin Daily Vitamin Protocol

OTC Supplements

Short Term Goal / Objective:

Patient will begin all four daily supplements and maintain consistency throughout the two-week plan.

Target Date: June 13, 2025 (Day One)

Completion Date: _____

Status: _____

Intervention:

- Vitamin D3 2000 IU: deficiency common in T2DM patients.
- Magnesium 400mg: supports blood sugar regulation and sleep quality.
- Vitamin B12 1000mcg: Metformin depletes B12 over time — essential to supplement.
- Omega-3 1000mg: cardiovascular support for hypertension management.
- All four to be taken together with breakfast. Use a weekly pill organiser.

Frequency: Once daily

Duration: Ongoing

Progress: Plans to start

Orb 7: Blood Sugar Self-Monitoring — 7 Days

HCPCS: A4253

Short Term Goal / Objective:

Patient will log fasting and post-meal blood glucose readings every day for 7 consecutive days.

Target Date: June 13–19, 2025

Completion Date: _____

Status: _____

Intervention:

- Equipment: blood glucose monitor and test strips (HCPCS A4253 — 50 count).
- Fasting reading: every morning before breakfast.
- Post-meal reading: 2 hours after dinner each evening.
- Fasting target: 80–130 mg/dL. Post-meal target: below 180 mg/dL.
- ALERT: any reading above 250 mg/dL — call Dr. Nair same day: (512) 472-1100.

Frequency: Twice daily Duration: 7 days Progress: Plans to start

Orb 8: Diabetic-Friendly Nutrition — 7 Days

Diet / Nutrition

Short Term Goal / Objective:

Patient will follow diabetic-friendly meal guidelines for 7 consecutive days and log each meal.

Target Date: June 16–22, 2025

Completion Date: _____

Status: _____

Intervention:

- Remove: white bread, white rice, sugary drinks, processed snacks.
- Add: leafy greens, lean protein (chicken, fish, legumes), whole grains, healthy fats.
- Plate method: half plate vegetables, quarter plate lean protein, quarter plate whole grain.
- Carbohydrate target: under 45g per meal.
- Log each meal in the app. Dietitian referral available on request.

Frequency: Every meal Duration: 7 days Progress: Plans to start

Orb 9: Book Both Specialist Referrals

ICD: Z01.01, Z01.89

Short Term Goal / Objective:

Patient will book both specialist appointments (ophthalmology and podiatry) by June 20, 2025.

Target Date: By June 20, 2025

Completion Date: _____

Status: _____

Intervention:

- Ophthalmology (Z01.01): Austin Eye Center, (512) 445-2020 — diabetic eye exam.
- Podiatry (Z01.89): Texas Foot Specialists, (512) 339-0800 — diabetic foot exam.
- Both must be BOOKED (not necessarily attended) by June 20 for orb to be complete.
- Appointments may be scheduled for a future date beyond the plan window.

Frequency: One-time Duration: Phone/online booking Progress: Plans to start

Orb 10: Final Self-Assessment and Submission

CPT: 99214

Short Term Goal / Objective:

Patient will complete and submit the 2-week self-assessment to Dr. Nair by June 27.

Target Date: June 27, 2025 (Hard stop: July 4, 2025)

Completion Date: _____

Status: _____

Intervention:

- Submit via patient portal OR call Austin Family Medicine: (512) 472-1100.
- Include: 7-day blood glucose log, medication adherence record, exercise log.
- Include: any symptoms, side effects, or questions for Dr. Nair.
- Next appointment: July 8, 2025 — orb review and lab results discussion.

Frequency: One-time Duration: Self-report submission Progress: Plans to start

SUCCESS METRICS — TO BE REVIEWED AT JULY 8, 2025 VISIT

HbA1c:	Baseline set at plan start. Target below 7.0% at 3-month recheck.
Fasting Glucose:	Target: 80–130 mg/dL (7-day log average).
Blood Pressure:	Target: below 130/80 mmHg.
Exercise:	Minimum 7 of 14 days completed with 20-minute sessions.
Medication Adherence:	90%+ — no more than 1–2 missed doses across 2 weeks.
Referrals:	Both ophthalmology and podiatry appointments booked.

PATIENT STRENGTHS, NEEDS, ABILITIES AND PREFERENCES (SNAP)**Strengths:**

- *Motivated to make lifestyle changes.
- *Supportive home environment.

Needs:

- *Medication management guidance.
- *Structured exercise routine.
- *Nutritional education.

Abilities:

- *Able to self-monitor and log daily readings.
- *Can follow structured daily routines.

Preferences:

- *Individual plan with clear daily tasks.
- *Minimal clinic visits during plan period.

Goals:

- **"I want to get my blood sugar under control and feel more energy day to day."

BARRIERS

Sedentary work schedule may limit daily exercise time.

- *Plan accommodates split 2x10 min sessions as alternative to single 20-min walk.*

Dietary habits — high refined carbohydrate diet established over many years.

- *Plate method and simple substitutions provided to reduce behaviour change friction.*

STATUS:

June 12, 2025: The undersigned clinician met with the patient in a face-to-face meeting to work together in developing this Treatment Plan. The patient has reviewed, understood, and agreed to participate in the 10 Orbs to Better program as described above.

Dr. Priya Nair, MD — Physician

Austin Family Medicine

Date: June 12, 2025

Marcus J. Elliot — Patient

I have received and understood this treatment plan.
